

Dear Hiring Manager,

I am writing to express my interest in the Senior Sales Manager / Senior Client Partner role at Aleph for the X platform. With over nine years of experience across digital marketing, business development, and international market growth, I believe my background aligns strongly with the client-focused and performance-driven nature of this role.

Over the course of my career, I have worked across South Korea, Singapore, and South Asia, managing digital marketing initiatives, business partnerships, and growth strategies for global brands including L'Oréal, Samsung, Oracle, LG Electronics, and Massimo Dutti. My experience spans both agency and in-house environments, giving me a strong understanding of advertiser expectations, campaign performance objectives, and cross-functional collaboration.

In my current role at Umesh Modi Group, I lead ecommerce and digital growth initiatives across South Asian markets. I have been responsible for scaling ecommerce operations, managing integrated marketing campaigns, and collaborating with local payment, advertising, and fulfilment partners to support business expansion and operational scalability. Through these initiatives, I contributed to achieving over 200% year-on-year revenue growth while maintaining ROAS above 500%.

Previously, while working in South Korea with JBridge Marketing Company and Incross, I managed performance marketing campaigns and client communications for major global brands across multiple digital platforms. My work involved campaign strategy, budget management, lead generation optimization, performance reporting, and presenting strategic recommendations to both clients and management teams. These experiences helped me develop strong relationship management and stakeholder communication skills in multicultural and fast-paced business environments.

Beyond campaign execution, I am particularly interested in the intersection of business growth, platform strategy, and data-driven marketing. With additional technical capabilities in analytics, SQL, Tableau, and Python automation, I enjoy using data and insights to support strategic decision-making and long-term business growth.

Having studied and worked extensively in Korea, I am comfortable operating within the Korean business environment and collaborating with cross-functional teams across international markets. I am excited about the opportunity to contribute my experience in digital growth, client partnership, and strategic marketing to Aleph and the X platform.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my background and experience can contribute to your team.

Sincerely,
Shubham Garg
